

You're invited to a **FREE Educational Seminar!**

The Future of ENERGY STAR for New Homes: 2011 and Beyond

THURSDAY, APRIL 1, 2010, 10 am to noon
Ferguson Enterprises, 4712 Baxter Rd. Virginia Beach

Enjoy a free brunch sponsored by  **FERGUSON®**

EPA is releasing a third-generation of ENERGY STAR guidelines for 2011. These guidelines will help transform the housing industry by creating homes with lower energy bills and superior performance through improved comfort, indoor air quality, and durability. This presentation will explain the new guidelines in detail, in addition to introducing the ENERGY STAR Concept Home for leading-edge builders.

Learn about:

- Building science basic principles that determine why buildings work and fail and how ENERGY STAR qualified homes guidelines address building science principles.
- New thresholds for ENERGY STAR qualified homes and increased mandatory checklists and how homes meeting new guidelines will make existing homes obsolete relative to performance and quality.
- Advanced technologies and practices being promoted for a new ENERGY STAR Concept Home label
- How ENERGY STAR Concept Home serves as a road-map to net zero energy homes
